

Simic scientist

Imagine a perfect world: one in which nature and civilization exist in harmony, adapted to each other; one in which life is shaped to match its environment and the environment is shaped to match life. That's the world you have been trying to grow in the laboratories of the Simic Combine. Nature is all about adaptation, evolution, and balance - but for it to keep up with the pace of advancing civilization, nature needs some help from biomancers and terraformers. If, along the way, you happen to create super-soldiers and mutant monsters that can bolster the combine's defenses against the schemes and ambitions of the other guilds, so much the better.

Source: Guildmaster's Guide to Ravnica

Skill Proficiencies: Arcana, Medicine

Languages: Two of your choice

Equipment: A Simic insignia, a set of commoner's clothes, a book of research notes, an ink pen, a bottle of squid ink, a flask of oil (made from blubber), a vial of acid (derived from digestive juices), a vial of fish scales, a vial of seaweed, a vial of jellyfish stingers, a glass bottle of unidentified slime, and a pouch containing 10gp (Azorius 1-zino coins)

Features

Clades and Projects

As a Simic researcher, you are part of a clade - a diverse group of individuals combining disparate talents in pursuit of a common goal - or a researcher on a specialized, short-term project focused

on addressing an immediate need. You can roll a d6 or choose from the options in the Research Options table to determine your area of research.

d6	Clade/ Project
1	Hull Clad e, focused on protection and durability
2	Fin Clad e, focused on movement

3	Gyre Clade, focused on cycli- cal patterns and meta- magic
4	Guardian Project, focused on creating guards monsters and super- soldiers

5	Crypsis Project, focused on intelligence and counterintelligence
6	Independent research in a new area

Researcher

When you attempt to learn or recall a magical or scientific fact, if you don't know that information, you know where and from whom you can obtain it. Usually, this information comes from a Simic laboratory, or sometimes from an Izzet facility, a library, a university, or an independent scholar or other learned person or creature. Knowing where the information can be found doesn't automatically enable you to learn it; you might need to offer bribes, favors, or other incentives to induce people to reveal their secrets.

Your DM might rule that the knowledge you seek is secreted away in an inaccessible place, or that it simply can't be found. Unearthing the deepest secrets of the multiverse can require an adventure or even a whole campaign.

Simic Guild Spells

Prerequisite: Spellcasting or Pact Magic class feature

For you, the spells on the Simic Guild Spells table are added to the spell list of your spellcasting class. (If you are a multiclass character with multiple spell lists, these spells are added to all of them.)

Simic Guild Spells

Spe II Lev el	Spe II
Can trip	Acid Splash , Druidcraft , �

1st	Det ect Pois on and Dise ase ,
2nd	Alte r Self ,

3rd	Gas eou s For m, Wat er Bre athi ng, Win d Wall
4th	Free dom of Mov eme nt, Poly mor ph
5th	Cre atio n

When your magic causes physical alterations in yourself or others, the result often displays the characteristics of fish, amphibians, or other water-dwelling creatures. Blue-green eddies of magical energy sometimes accompany your spellcasting, forming spirals that reflect the mathematical perfection of nature.

Suggested Characteristics

The bizarre science of the Simic Combine attracts a certain type of personality and encompasses a set of beliefs about the nature of life. Simic members' bonds and flaws derive from their scientific research - including their creation of new life forms, which they can become very attached to.

6

I have a tendency to take short cuts in my research and any other task I have to complete.

Contacts

The fluid nature of clades, whose rosters span different laboratories and change as researchers discover new interests, creates abundant connections among the Simic. The guild members live in watery sinkholes called zonots, and their isolation shelters them from much contact with outsiders. Nonetheless, a fair number of Simic members are former members of other guilds.

Roll twice on the Simic Contacts table (for an ally and a rival) and once on the Non-Simic Contacts table.
